

## 10 Most Promising Stock Market Training Institutes – 2019

The stock market is now becoming the leading business strategy attracting millions of traders from across the globe. Today's millennials look at trading as one of the easiest methods for wealth creation and opt to trade as their part-time business to earn extra penny. These newbies presume market as a sea of free money that keeps moving up & down everytime and where they can make money by just executing some traders. But, not all are going to make profit as they cannot beat the market due to lack of knowledge.

On the flipside, most of the time people mess between trading & investing which are completely two different approaches of wealth creation/generating profits in the financial market wherein trading requires more market knowledge and technical skills. To befit the paradigm of expert traders, experience in experimentation with ace trading market skill is must; but for new comers & professionals, the task becomes incredibly difficult as they lack market experience and practice. However to

gain the same, they start educating themselves with a lot of indicators, different types of trading strategies, subscribe to various telegram channels for signals which in-turn lead to poor performance in the stock market.

The only thing needed to upgrade overall skills and practical knowledge is by undertaking right training covering all crucial technical features of share market trading with risk mitigation and money management awareness. In this issue of siliconindia, we bring to you '10 Most Promising Stock Market Training Institutes – 2019', that not just render live market training but also gives hands-on experience and motivate traders at every step of their journey. The listing is prepared by an exclusive panel of eminent leaders and contributors in the stock market industry, along with the siliconindia Editorial Board. These institutes have numerous stories to share wherein their offerings have helped not just new comers but also professional traders to earn maximum profit.

An online-exclusive stock training academy that provides courses to global learners and provides them life-long support at a very reasonable fee

## Indian Option Trading Academy: Empowering Individuals to Supplement their Income & Wealth Creation

Falling for the fraudulent tip/advice provided by various stock trading service providers is a norm in a country like India, where people try investing their hard earned money to earn some quick and healthy returns. "On the other hand, these early learners who are totally dejected due to such heavy losses struggle with lack of awareness on how to handle market volatility, which is why they get trapped in the gambling net trying to recover losses," explains Rajendra Pathak, Founder, Indian Option Trading Academy (IOTA), a stock trading training institute.

Rajendra Pathak,  
 Founder

The company is on a mission to deliver the best equity trading and investment strategies to its clients and investors to supplement their regular income and long term wealth creation. Hence, IOTA provides the mantra of 'stay away from tip providers', which restrains its learners from falling into the trap. "We have made Mind-Management an equal (if not more) important part of our training," adds Rajendra. This Mumbai-based institute is probably one of the few institutes that provide exclusive online training in Hindi, while the courses are too easily comprehensible. Despite being a low cost program, IOTA provides life-time support to its learners and hence caters to learners not just from India but globally.

#### Unique Attributes

Working on the philosophy of life-time support, IOTA's learners have access to trainer 24/7, thus ensuring regular online connect, which keeps the learners updated with current market trends. Further, the institute works towards developing fully independent traders who need not depend on other ambiguous sources. Established in 2015, IOTA offers pocket-friendly courses akin to ABBM (Any Buddy Become Millionaire – a comprehensive online training program with basic and advanced technical analysis along with Made Easy Trading Option (METO) and Jackpot Trading Strategies (JTS)), BATA (Basic & Advanced

Technical Analysis), METO, JTS, and IDTS (Intra-Day Trading Strategy).

The institute also conducts low-cost mentorship program (one-year course) and will soon be launching the EDTS (Expiry Day Trading Strategy) with three levels. "Our training courses are programmed with such simplicity that anyone (student, retired personnel or house wife) can benefit from it. Our mission is to help even an amateur to earn at least Rs.2000-5,000 on a daily basis," says Rajendra who leverages his three decades of experience in investment consulting and tax planning in the financial service industry to educate

the learners. He has the hunger to keep learning relentlessly which helps the institute provide latest training modules, which adds towards the success of the students.

Adhering to strict technical analysis results and Rajendra's experience enables IOTA to keep the training content authentic, thereby maintaining the quality of the program. Having recently launched the EDTS course, the institute will soon be launching the OOMC (Online Option Mastery Course), aims to reach every individual who are eager to earn regularly at a low investment towards training. "We want to see people make a concrete mind-shift from considering stock market as a gambling adda to a genuine profession. Hence, we focus on the learners ROI by trying to provide them various different trading platforms," concludes a proud Rajendra for whom the profits earned by his students are his greatest achievements.
